

# 6 REASONS TO ADOPT SEAMLESS FIELD-TO-OFFICE WORKFLOWS

As projects continue to grow larger and more complex, heavy civil construction teams are implementing digital strategies to connect the office with the field and drive productivity, transparency, and cost savings.

Ensuring that your team has the right digital applications in the office and field is the key to increasing productivity, reducing complexity, and maximizing operational efficiency.

## SIMPLIFY DATA COLLECTION –

**46%** of horizontal contractors say that using field and project management tools help maximize project data value at a high level.

## ENSURE DATA IS ACCESSIBLE – FROM ANYWHERE AND AT ANYTIME

**61%** of horizontal contractors say they see a high to very high difference in project data value when using field management applications.<sup>1</sup>

## KEEP TEAMS CONNECTED AND COLLABORATIVE

**76%** of horizontal contractors report using applications to increase team coordination.<sup>1</sup>

## DRIVE BETTER PROJECT SITUATIONAL AWARENESS

**98%** of virtually all horizontal contractors perceive that the use of field and project management applications result in fewer schedule delays.<sup>1</sup>

## INCREASE SAFETY AND IMPROVE FIELD PRODUCTIVITY

**35%** of horizontal contractors report that the use of field and project management applications improve labor productivity.<sup>1</sup>

## REDUCE COSTS AND INCREASE PROFIT MARGINS

**65%** of respondents said that construction cost overruns are the biggest risk that field and field-to-office workflows are reducing.<sup>1</sup>

**“By downloading SYNCHRO... and channeling our communication through it, we have been able to seamlessly capture and manage information in real time – and all in one platform alongside the model.”**

**– Nick Chrono**  
 Project Engineer, Lane Construction<sup>2</sup>

## CHECK OUT SYNCHRO

A complete portfolio of integrated applications for digital construction management.
