

SYSTEM REQUIREMENTS

SYNCHRO Notes and SYNCHRO Crew are mobile apps available for iOS and Android devices

Both apps connect to SYNCHRO DailyLog (formerly the NoteVault platform) for Dailylog events recordings from field, crew reporting, and data storage in the cloud

iOS – iPhones and iPads running iOS 12 or higher

Android – Phones and tablets running Android 8 or higher

SYNCHRO Notes and Crew At-A-Glance

ENHANCE THE QUALITY OF REPORTS

Users are more likely to document project notes, because it's so easy to do. All you need is a mobile device to take notes, snap photos, and record videos at the touch of a button. All documented data feeds into your daily report - each note entry is time, data, and location stamped.

ACCESS SPECIFIC INFORMATION

Access specific information in seconds with SYNCHRO's keyword search. Skip the hassle of sifting through paperwork to find what is needed. Your reports serve as your digital database for any information you need.

KEEP TEAMS PROTECTED

Easily document any verbal agreements, change orders, and disruptions that may arise. SYNCHRO keeps an independent record of events – including hosting and time stamping on every note – making the data irrefutable. Clear documentation can help prevent faulty claims, avoidable damages, and work disputes.

CAPTURE RICH PROJECT DATA IN SECONDS

Streamline the documentation process. All you need is a mobile phone to record audio notes, take pictures and videos, or type notes. Teams can access all recorded project information whenever and wherever
